ABSCESSSED TOOTH

On a Monday early March 2001, I had my left eyetooth filled.

The Dentist had serious doubts that he had the problem resolved, warning me that he considered I most likely need a root canal filling. He stressed to come back **immediately** if I had any pain.

On the Wednesday morning I awoke to a pretty sore tooth, but I delayed going to the dentist, as sometimes a freshly filled tooth can be quite sore as it settles. By nightfall I was in deep trouble and could not even chew the softest food. The pain went up my cheek into my eye.

I then started taking 4 Transfer Factor Plus every 3 hours (12 capsules by midnight).

The morning broke with the pain considerably reduced so I kept the pressure on by continuing to take 4 Transfer Factor Plus every 3 hrs.

By nightfall the pain had gone completely and I have not been back to the dentist for that tooth since.

Then in August a double molar suddenly made itself known to me. I could not eat any food on my right side, and even had to stop for spells to let the pain settle down. Again the pain ran up into the eye area.

I successfully used the same formula of 4 Transfer Factor Plus every 3 hrs and within 24 hours the pain had gone and has not returned.

While it took 1/2 a bottle of Transfer Factor Plus on each occasion, it was considerably cheaper than going to a Dentist!

ACNE

I have suffered from bad acne for many years. I have tried all sorts of different skin care and beauty products to help clear it up. I have also covered it with makeup (which only made it worse) because I was so embarrassed of how my face looked.

I decided to try the **tf Age Defying Effects** range of purifying skin care.

I started to see results after about 5 days of using the system that consists of a cleanser, day moisturiser and a night serum. My skin looked clearer and free of acne.

Now I feel so much better about my skin that I often go without any make up at all.

My husband and family all can't believe the results and it has given me much more confidence.

I recommend anyone who has concerns with their skin to try this Transfer Factor skin care range.

ACOUSTIC NEUROMA

In May 2000, I was diagnosed with acoustic Neuroma - a benign tumor of the inner ear.

This resulted in a continual whining in my ear, an inability to hear any normal sound, continual nausea, and loss of balance. I also had the feeling that my ear was blocked all the time.

Because I could not withstand any noise in that ear, I was unable to do simple things like attend church, walk past a lawnmower, use the telephone, or withstand the noise of the trains that passed our home everyday. It was extremely depressing.

Then I was introduced to Transfer Factor Plus and started taking 4 capsules per day.

Within three days the nausea stopped and my balance returned.

Within a week-and-a-half, I didn't have to cover my ear at all. I could withstand noise!

After two weeks, I could telephone again using the affected ear, and perhaps best of all, the ear does not feel blocked anymore.

I feel so good; we have postponed an operation I was due to have to have it cut out. We will monitor the situation of course, but meantime Transfer Factor Plus has certainly made a huge difference to my life.

ALLERGIES

This is the time of the year that I am usually driven crazy by the effects of the Privet tree flowers, and other non specific pollen that is in the air.

I have year after year had to put up with a running nose, stinging eyes, nausea, and an overall feeling of being ill until the flowers disappear.

And while I notice that the Privet tree next to our carport is in full flower (as are several in the neighbouring sections on both sides), this year I am quite free from any allergic reactions at all.

I can only put it down to the fact that I have been taking Transfer Factor Plus since July last year.

Apart from occasionally waking up with a blocked nose that quickly clears, I have had no other symptoms that I have been used to putting up with.

I thoroughly recommend that anyone who has trouble with allergies of any kind consider taking Transfer Factor as a way of being free of these energy sapping allergic symptoms.

Terry Conlan
Registered Nurse
Mangere

ALLERGIES

I have been an allergy sufferer for approximately 10 years. Every year around October my eyes, ears, nose and throat were all badly affected.

Over time the condition worsened so that I could not even open my eyes some days. The whites would swell up like jelly. I always felt as if I had a full-on head cold for six months of every year and this would wear me right down.

I was unable to sit on grass, near a beach or in the garden, and I certainly wasn't able to cut the grass with the lawnmower that I had previously enjoyed.

You see my allergy is to grass.

I lost a lot of sleep at night because my nose was always blocked in the lying position.

In October 2000 I started to take 9 Transfer Factor tablets every day during the worst of the allergy season and I honestly felt so much better. And even better, my energy levels picked up immensely.

I didn't end up in welts last year, which would normally happen a couple of times each season.

So, I would like to let any allergy sufferers out there know that this product really is wonderful and has changed the way I feel about October to February of every single year.

Thank you.

ANAEMIA (SIDEROBLASTIC)

Eighteen years ago I came down with a bad viral flu and ended up with acquired Sideroblastic Anaemia, a rare blood condition where many of the red corpuscles do not absorb iron hence a lack of energy and an overload of iron.

I was also prone to infections proving my immune system was compromised. I would get a cold and usually ended up with a secondary infection and would need antibiotics.

Six months ago I started taking Transfer Factor Plus, 2 capsules per day, and soon noticed more energy as time went on. I found by just stepping up my maintenance dose to 6 capsules per day I could throw off sore throats. If I contracted a cold I would only have it for a few days where once it would be for weeks.

Sinus problems that I also suffered are now a thing of the past. My blood tests are improving too.

I am so thankful to God for bringing Transfer Factor across my path as I had tried many things with only limited success.

ANIMAL BITE

Last month I was bitten by a wild feral cat on my farm. My finger soon swelled up like a balloon and began to throb.

I had just started taking a product called Transfer Factor Plus. My brother - who had convinced me to try it - called to ask if anything had happened for me. I told him I had been bitten, and that it was so sore and swollen that I was on my way to get a shot from the doctor when he rang. He told me to take 5 Transfer Factor Plus capsules with at least 2 big glasses of water and then to do the same again the next day.

Being very sceptical, it took my brother quite a lot to convince me. I finally promised to give it a go, but only until the next day! He insisted that I call him with the results either way.

I was amazed by the fast results. I called him and told him that if it weren't for the puncture wounds still very visible on my finger, I would never even know I had been bitten. The swelling and pain had completely gone!

At the same time I had a side effect that I had not expected.

For over 30 years I had breathed through my mouth because my nose was always blocked. Suddenly my nose cleared up and I could breathe through both of my nostrils!

I now have to admit I am very grateful to my brother for introducing me to Transfer Factor.

ARTHRITIS

I am an active 70-year-plus lady with arthritis. I play tennis and golf, but have had to wear a support for weakness in my left wrist. I have suffered with arthritis for many years.

A good friend of mine introduced me to Transfer Factor and here's what happened.

I had decreased swelling and pain within 7-10 days, and after only two weeks, I removed the support altogether. Within four weeks I had 80% more use overall!

Now I know everyone's system is different, but I can feel that my immune system has been dealt to, causing inflammation build-up to clear away. The only problem now is that my golf swing is rubbish because I have more free movement! Still, I guess you can't have everything.

A bonus for me was taking just one capsule immediately before playing golf, and having my sinuses clear within 1 hour and staying that way for the rest of the day. Again I put this down to my immune system being boosted up.

When I have the grandkids to stay, I have them take Transfer Factor for colds etc. It clears them up like antibiotics (only better - because antibiotics don't help our immune system long term). I have Transfer Factor on-hand all the time because it's natural- not drugs.

Everyone should get some of this product - it's great.

Hema Tata
Pakiri

ARTHRITIS

Around 45 years of age I developed Arthritis and severe joint pain and swelling in my left ankle and fingers. My doctor prescribed Voltaren, and although this stopped the pain, it affected my stomach and digestion.

I had to give up my two major leisure activities - windsurfing and guitar. I even had trouble walking with the pain. The scariest thing was that each time it flared up - about every six weeks - it was worse than the time before and I didn't know how bad it was going to get.

Somebody introduced me to Maritime Pine bark extract, and it seems funny saying it even now, but the fact is that ALL the pain and swelling in my ankle disappeared in just seven days. I have never had it back again. My fingers took more time - around nine months or so. I am now back both windsurfing and playing guitar again.

I take 3 Choice Prime and 2 Transfer Factor capsules a day for maintenance and could not imagine a day where I would not take these two products.

To say they changed my life would be an understatement indeed!

ARTHRITIS

I developed serious arthritis after badly smashing my hip and knee in a car accident. I developed a limp and was on ACC for over four years. It used to take me about 20 minutes of exercises just to get out of bed in the mornings.

My son introduced me to Maritime Pine Bark extract, and it truly does sound strange to say this, but after just seven weeks the pain disappeared completely and I had no limp.

I also feel (and look?) younger every day and have more energy than I know what to do with. I am 75 and currently line-dance for up to 15 hours per week. Some of the young ones have trouble keeping up with me!

I only take 2 **Choice Prime** capsules a day to get this incredible result and would truly recommend this product to everyone.

I also take 2 Transfer Factor Plus per day for preventative purposes and now I rarely get the colds I used to have last three or more months at a time. On the rare occasion I do get a cold, it clears up in no time at all.

ARTHRITIS

Several years ago I noticed dreadful, lingering pain in my fingers - especially if I did something like accidentally knocking them on a door or cupboard when passing. Also the increasing pain and swelling of the joints in my fingers was interfering with my hobby of painting.

I was introduced to Choice Prime (Pycnogenol Maritime Pine Bark extract) and decided to try some.

Nobody told me to build up slowly to the full daily dose so I just started from day one on the full eight a day. But I had no side effects except for great ones!!

Within a couple of weeks all the pain had gone!

I now take three Choice Prime a day. In addition I also take Transfer Factor. I am happy to say that I am free from the pain of arthritis and really enjoy feeling great!!

ARTHRITIS & HEART PROTECTION

For a number of years I had been experiencing increasing pain and reduced movement in both of my hands. My finger joints were so painful at times that I had to consider giving up playing golf! (a tragedy that was totally unacceptable).

I started using Choice Prime and within three-and-a-half weeks I had no pain. 2 capsules per day of Choice Prime have not reduced my golf handicap - but it has certainly removed the pain. I also take Choice Prime for its effectiveness in keeping arterial plaque at bay. I want to prevent a heart attack, not just wait to have one!

I had also been taking a slow release antibiotic every day for 14 years for a long-term health challenge. I decided to stop destroying my liver (the pharmacist who had dispensed the anti-biotic finally told me that's what it was doing to me!) and use a natural alternative. I now take 2 Transfer Factor Plus capsules a day – get the same result - and no antibiotics!

ASTHMA - CHRONIC

I've had severe asthma for 15 years.

I have even ended up in hospital with attacks, and would be taking my preventive inhaler continuously.

I have been on Transfer Factor and Choice 50 antioxidant for just four weeks now, and now I find I'm not having to use my inhalers at all.

Maree Jewell

Canterbury
New Zealand

ASTHMA - CHRONIC

At age 3, I was classified as a chronic asthmatic.

This was so serious for me that for much of my life I have been a Greenlane Hospital Asthma Clinic guinea pig for new drugs and steroids.

The three times in my life that I tried to get off my drug regime, I ended up in the operating theatre being shocked back to life.

My lifetime daily drug regime included steroids like Prednisolone and strong drugs like Theophylline to relieve symptoms.

A friend suggested I try a special antioxidant extract from the bark of the Maritime Pine Tree. The results continue to amaze me every day. Almost immediately my circulation and colour improved. Then patches of psoriasis cleared up. My need to rise several times a night disappeared, and then after 6-8 weeks, my chest and asthma cleared. I had so much improvement in so many different areas.

I have since eliminated all steroids and drugs for my asthma. The only thing I now use is a very mild preventative puffer when occasionally required.

My energy is back and I am very grateful for my daily dose of **Choice Prime**.

I also take Transfer Factor Plus every day to keep my immune system working at the top levels.

ASTHMA & INFECTIONS

I have a history of asthma, bronchitis, fevers, aches and pains from viral and bacterial infections.

For as long as I can remember, I have been getting infections for which I would need treatment - usually in the form of antibiotics. But then I would have to go back to the doctor to receive treatment for my reaction to the antibiotics. It just seemed to be a never-ending cycle of infections and reactions - as well as the expensive doctor visits and prescription bills of course.

I have been taking 2 Transfer Factor capsules per day for 6 months and in this time I haven't been to the doctor once! Usually I would be at the surgery every 3 to 4 weeks.

I have also ceased taking all of my asthma drugs including my inhaler.

If I feel a cold or virus coming on I just double my intake of Transfer Factor to 4 capsules a day, and within 24 hours, all signs of sickness are gone. It is a huge relief for me not to be on antibiotics all the time, and that finally I have some resistance to all the bacteria and viruses that have effected me for so long.

I feel so strongly about what has happened to me that my next goal is to make sure all Natural Health Professionals know about Transfer Factor. I want everybody to know how great this product really is.

Sue Keate

BELL'S PALSY

On Labour weekend 2002 I developed a droopy mouth on one side and my right eye would close at a different time to my left eye. I couldn't drink anything without some dribbling down one side of my mouth. I felt truly miserable!

I had had an operation three weeks previously to remove my gallbladder. This did not go as smoothly as we had wished. Also for some time I had been experiencing chronic back pain and 'pins and needles' down both legs. As you can imagine I was very depressed.

The doctor was concerned when he saw my face and sent me for a CAT scan the next day. He said he was reluctant to prescribe anything that might disguise any symptoms until they were sure what was wrong with me.

The result of the CAT scan was that I did not have a tumor and I did not have a stroke so the conclusion was that I had Bell's Palsy.

The good news I was told was that it would get better, and the bad news was that it usually took several

months to a year in many cases before being free from the facial distortions.

Once home I immediately began trebling and more my Transfer Factor and Choice Prime as well as taking daily the 'Rite Start' which contains all the vitamins and minerals the body needs.

In less than three weeks I had lost all the signs of the Bell's Palsy!

My doctor was amazed and wanted to know all about Transfer Factor - as did my Osteopath who was treating me for my back and legs. They had never seen such a rapid recovery from Bell's Palsy.

I am free from pain and feeling great! I can't say enough about Transfer Factor, Choice Prime and other products I take. I shall continue to take maintenance doses.

Jan Du Flou

BREATHING / RESPIRATORY

My partner has had sinus and respiratory problems all of his life.

It has been so bad that he has had operations on his nose in an attempt to overcome his blocked nasal passages and ease his breathing.

It is particularly serious at night when he has to breathe through his mouth because his nose is always clogged.

The problem becomes more difficult at various times of the year when he is more affected by pollen and his allergies.

I introduced him to Transfer Factor and he took 3 capsules per day.

Within a short time – even before he had finished his first 90 capsule bottle - he found that he was waking in the morning with clear nasal passages.

At this time of the year, he would also normally be battling with a continually dripping nose. This is not happening either.

For the first time in as long as he can remember, his nose is clear - not dripping – and he can breathe through his nose at night.

He is sleeping more restfully at night (aren't we both!) and this is making a huge difference to the quality of his (and my) life.

He has also noticed an improvement in his general wellbeing - *and* his arthritis has improved. We are still working on this and expect even more improvements as time goes on. Watch this space!

BRUISING

My hands had been bruising with the slightest touch. I understood it to be what happened as we got older.

Fifteen months ago I started taking Choice Prime – a very powerful antioxidant from the Maritime Pine tree.

My hands are now free of bruises and the skin is so much stronger and no longer paper-thin.

I also take Transfer Factor and now know that I have maximized protection against cancer.

CANCER (BREAST)

At the end of November 2001, at 40 years of age, I was diagnosed with oestrogen receptor-positive breast cancer. I had two tumors in my left breast.

My surgeon wanted to operate as soon as possible and booked me for surgery in December - but I decided that I would wait before surgery, and immediately instituted a number of lifestyle changes.

Having heard about Transfer Factor Plus, I also began at once on this product. My dose (the 60 count size bottle) was 22 per day for the first week, 21 per day for the second week, 20 per day for the third week, and so on.

The surgeon was ready to operate, and I went for a scan in preparation. My husband came with me to the session and asked the surgeon if she'd ever seen a patient improve by using alternative treatments. She said she had not. After taking the scan she said, "Now you've made a liar of me!!"

What she saw was that one tumor had noticeably shrunk.

I went ahead with the surgery and reconstruction on 4 January 2002, and had a fast and excellent recovery.

The four underarm nodes taken for biopsy were all clear of cancer and that surprised the surgeon.

I am continuing on with the TF Plus at a good working dose.

The staff in my Doctor's office asked me to come in and talk to them about what I had done. Due to the fact that I had been diagnosed with grade 3 cancer, the most aggressive type, and that my breast had 2 tumors, plus was riddled with cancerous cells, they were amazed at the shrinkage of my tumor and the absence of cancer in the nodes.

Finding out that I had cancer was naturally a huge shock for me, but when I investigated I found that there were many many helpful things I could do.

I strongly believe that TF Plus, in combination with other lifestyle and nutritional factors, was responsible for my tumor shrinking and for my being cancer free now.

I believe it is possible to triumph over cancer and would be happy to talk to anyone about my experience.

Andrea Durrant
Auckland

CANCER (BREAST) & CHEMOTHERAPY

In July 2000, I was diagnosed with breast cancer. Within two weeks I had my left breast and some underarm lymph nodes removed.

After I was well enough from my operation and breast reconstruction, my Doctor said I was ready to begin six months of chemotherapy. He said I would experience some sickness, and if it was too bad, he could give me a further drug to counteract it.

I went to a Naturopath who not only recommended lifestyle and dietary changes, but also immediately put me on Transfer Factor Plus. I have been taking 6 capsules a day when the chemicals are being administered and 4 capsules a day the rest of the time.

I am now beginning my third month of chemotherapy, and to my absolute delight, I have had no sickness whatsoever. I have not lost any hair, and I have been able to continue with my part-time job.

Soon after I take my Transfer Factor Plus capsules, I can literally feel a boost of energy.

I am very happy!

Duska Grkovic
Auckland
New Zealand

CANCER (BREAST) RECOVERY

Following surgery to remove a cancerous lump from my right breast, I found that movement of my right arm was non-existent and could only be done with severe pain.

My sister told me about the transfer factor products that she had been taking for several weeks herself. I started on FibroAMJ and Transfer Factor. I took 3 in the morning, 3 at mid-day and another 3 before dinner that evening.

That same day, we were having dinner in the sun porch and someone called out, "Open the doors it's hot in here." Without thinking I reached up with an outstretched arm and opened the door with my right arm. I looked at my sister and said, "You've got to be kidding." That was only the beginning of a journey that has not only astounded me but my family as well.

Staying on this regime in the days that followed I continued to be aware of other changes. The site of the surgery had festered so I applied the TF Renewal Gel and within 24 hours I noticed immediate changes. The wound took just a couple of days to heal. Having had other surgical procedures in the past and being prone to infections I was thrilled. Within a couple of weeks I had full movement of my right arm and no physiotherapy was required.

Chemotherapy came next, for which I was prescribed medication to counteract some severe side effects. I opted instead to take the Transfer Factor.

Before the chemotherapy I was taking 6 Transfer Factor Plus capsules per day. I increased this by 2 capsules each day until on the day of the chemotherapy I was on 20 capsules. I remained on 20 capsules for 5 days then came down by 2 capsules per day until I was on 6 capsules per day where I remained. Apart from some hair loss, I developed none of the more severe side effects of the chemotherapy and was able to continue with my part time teaching job.

Transfer Factor has also given me much more energy and I am grateful to everyone concerned for this amazing product.

Lillian Karaka
Cambridge
New Zealand

CANCER (BREAST) & THYROID GLAND

In early March 2002 I was diagnosed with breast cancer.

My family were very keen that I would move along with the medical regime. However, having heard about Transfer Factor Plus, and finding I had three weeks before my surgery, I began to take the Transfer Factor Plus (60ct) 20 per day.

I also have a thyroid condition and have been taking thyroxine hormone for nine years.

Just before my breast operation, I had a routine set of blood tests for the doctor who monitors my thyroid condition, and he was amazed and asked what I had been doing different because my blood tests were excellent - the best he'd ever seen in the last nine years.

I had my breast operation and came through very well.

My doctor was very pleased with my fast rate of recovery. I am continuing on with the Transfer Factor Plus to keep my immune system vigilant.

CANCER - LEUKEMIA

Two years ago my 12 year-old daughter was diagnosed with ALL Leukemia.

She started a course of intensive chemotherapy but nine months into her treatment she relapsed in her central nervous system.

It was decided that she needed a Bone Marrow Transplant. She underwent more chemotherapy, Cranial Irradiation and Total Body Irradiation that wiped

out her own bone marrow to prepare her for her donor – and that was me.

Two weeks prior to her transplant she relapsed again so the outcome of her transplant wasn't looking great. At that point I decided after talking to a good friend of mine that if she relapsed again I would put her on Transfer Factor.

The transplant went well but after 7 weeks she developed symptoms in her brain. After 3 MRI scans showing 3 lesions on her brain it was confirmed she had another relapse.

I started her on Transfer Factor at 20 capsules a day straight away and within a few weeks I noticed an improvement in her energy levels.

But at that point the doctors told us she had only weeks to live so we took her home to die.

Six weeks later she seemed to be getting better and her blood counts were all within normal range. This went on for quite some time and the fact that she needed no blood or platelet transfusions was telling me that this was working for her.

Then in January of this year we were told that her cell count was down from 112 to 9 and a month later it came down to 7!

Last week we were told her cell count is now on 1 which is remission and also the best she has ever been. This is pretty amazing considering she had no chemotherapy in those 7 months.

She is currently taking 12 transfer factor a day (as well as good nutrition) and she quite literally has her life back.

We are so grateful to the people involved in producing this amazing product. They have given us back our Santana.

CANCER - LIVER

In May 2000 I was diagnosed with breast cancer and had a full Mastectomy.

Radiation therapy followed, but unfortunately secondary cancers had already traveled to my lymph nodes.

In July 2001, I was told that I had developed cancer in my liver. I was also told that it was the worst and fastest growing kind of cancer – and in the worst part of my body to treat.

I was told that that there was nothing that could be done for me medically (even though I was started on first-stage chemotherapy) and was given from 6 weeks to a few months to live at the most.

In July 2001, a friend of mine told me about a new natural product called Transfer Factor Plus. I researched the product and decided to start taking it.

Over a week or so, I built up to taking 20 capsules per day and stayed on that dosage for one week. Then I dropped to 16 per day and then down to my current dosage of between 10-12 capsules per day.

I also took 4 capsules of Choice Prime antioxidant through this period – and I still take this now.

In October 2001, my oncologist informed me that my liver function had improved and there was an improvement again in November.

Then in late November, I had a CT scan with a result that amazed my oncologist (and ME!).

He advised me that the CT scan showed marked shrinkage in all the tumors. Bearing in mind that I had been given just a few months to live about 15 months previously, I must say everyone was very surprised and pleased.

I feel so much better with no nausea and I am back to eating most foods again.

Transfer Factor Plus has quite simply given me my life back again, and although I know it is early days, I expect to continue improving and have a full recovery.

I believe that thinking positively has been an important part of my recovery, but there is no doubt in my mind that I am here today (and in such good spirits) because of the miracle of Transfer Factor.

Thank you to everyone connected with the development and supply of this wonderful product.

CANCER – LUNG (1)

5 years ago my auntie in Switzerland had breast cancer.

The cancer went into remission and the doctors told her that if it did not come back in 5 years she would be cured.

After 5 years the cancer started in her lungs.

I heard about it through my mother in the beginning of this year. I immediately rang up my cousin to tell her about Transfer Factor Plus. They decided to try it, because the doctors could not give much hope.

She took 20 capsules per day for one week. After three days she felt more energy, the dizziness went and she could go outside on her own again.

Unfortunately after six days she ran out of product because the post delivery system let us down between NZ and Switzerland and she immediately felt the difference. She was going down hill again. She was admitted to hospital because her lungs started to leak and she could hardly breathe.

She had to stay in hospital for about 6 weeks. She was a little reluctant to take the Transfer Factor Plus in the hospital with all the nurses and doctors. However I

convinced my cousin to feed her about 10 Transfer Factor Plus whenever she visited her mum.

I visited her in March and even though she lost a lot of weight and her hair from chemotherapy, her eyes look amazingly clear. The result of the water in her lungs came back as clear and she had an operation to fix it.

After that she was able to go home and I put her on 15 capsules per day of Transfer Factor Plus for 2 weeks, 12 for 2 weeks, 9 for 2 weeks and so on. She is now on 3 capsules of Transfer Factor Plus a day. She has put on 7 kg of weight and her hair is growing back.

In May her blood results came back all clear.

She is now out and about and wants to do some travelling.

CANCER – LUNG (2)

On the 3rd May 2000 my husband went to see our GP regarding the pain in his left kidney.

It was discovered that he had Renal cell carcinoma (Kidney cancer) which has also spread into the lungs.

He was given 6 months to live.

A 3kg tumor was removed on the 23 May 2000.

In July 2000 he started with 3 injections per week of Interferon. The cancer was now measured on the nodules of the lungs.

Report 5/5/2000

Multiple well-defined rounded nodules are distributed throughout the lungs consistent with wide spread of pulmonary metastases. The largest nodule measures 4cm.

Report 20/6/200

Some nodules appeared slightly larger and some slightly smaller.

Report 6/10/2000

Slight diminution in size of some pulmonary modules since last examination.

Then in about November 2000, I heard of Transfer Factor Plus from a friend. We contacted a 4Life Distributor and he sent me some information. I actually never read it but just ordered the product. I was desperate to find something to keep my husband alive. He was only 41.

We started off with 2 capsules per day and increased it to 12 capsules a day for about a week. Then we decreased it to 4 tablets per day which, he is still taking today.

Here are the current results.

Report 26/2/2001

Compared with previous x-ray several of these nodules are **definitely** smaller in size. Some have **less distinct** margins. The most **striking** diminution has appeared in the large nodule on the lateral view.

This all was wonderful. We were going in the right direction! The last x-ray was done in August 2001 where the largest nodule was only 12mm compared to the 40mm it was. Only two definite nodules were now to be seen measuring 12mm and 7mm in diameter.

All the above are exact quotes from the x-ray reports.

My husband is still on Interferon and Transfer factor Plus. We are going for X-rays in six weeks and I am happy to give anyone the results.

Regards,

Marion Pienaar

CANCER - THYROID

A lady contacted me from hospital with advanced thyroid cancer. She was scheduled to have a biopsy in 9 days time.

I sent her Transfer Factor Plus. She took 4 capsules 3 times a day.

On the 9th day when the surgeons operated, they were amazed at all the dead cancer cells they found. They advised to continue with Transfer Factor Plus. They couldn't compete with it.

I have the medical report in my keeping.

CANCER – EWING'S SARCOMA (BONE)

My name is Shaylee, I am 19 years old, and last June I was diagnosed with Ewing's Sarcoma, a rare form of bone cancer. I immediately started on chemotherapy.

I met a woman in oncology who recommended I try Transfer Factor Plus.

I took 4 Transfer Factor Plus capsules twice daily and there was an immediate improvement in my general well being. But more importantly, the amount of nausea tablets I was taking decreased to ZERO! This was the case with my pain medication too.

I was taking morphine for chronic pain, but when I increased the Transfer Factor Plus, I felt no pain whatsoever. My doctors were astounded and I could not believe it.

From taking 26 tablets a day which my oncologist prescribed, I instead took a few Transfer Factor Plus and was completely free of nausea and pain.

I now have a clearance of the cancer, all of which I attribute to the miracle of Transfer Factor.

I now take 1 Transfer Factor Plus a day for maintenance.

CHEST INFECTIONS & COLIC

My 2-year-old boy has been ill since birth – suffering from colic, asthma and reoccurring chest infections.

Every month I would take him to the doctors at least two times, and they would usually prescribe antibiotics in some form or another.

The infection would disappear but within 2 weeks it would return, and he would be coughing and wheezing all night. He always seemed to have a cough and flu.

A friend of mine told me about TF Kids. It was easy to get him to take them because they tasted like lollies.

After 2 weeks of taking one every morning his flu finally cleared up and his coughing was less, so I decided to put him on straight Transfer Factor. I would empty a capsule into his bottle morning and night.

Within a week of doing this he was having peaceful sleeps with no coughing. He seems so much healthier now. He still gets the odd cough, but I know that if he didn't have Transfer Factor the cough would become a full-blown chest infection. He is now improving all the time and I'm very thankful to those who make the Transfer Factor available.

CHOLESTEROL REDUCTION

I had an angioplasty for severe angina (heart disease) 8 years ago. My Doctor remained concerned for my health and continued to monitor closely my blood pressure and cholesterol. I remained on a strict Heart Foundation diet.

The Doctor became concerned when a routine test showed that my cholesterol had suddenly climbed to 6.9. He urged me to reduce it down as quickly as possible.

It was at that time that Transfer Factor Plus became available in New Zealand. I started taking 2 Transfer Factor Plus capsules per day along with Choice Prime.

I went for a routine check 3 months later. After checking my heart, blood pressure and pulse the Doctor sat back amazed. "What have you been doing?"

Confidential

There is such a total change. You check out like a 25 year old! Whatever you are doing, keep on doing it!" (I was 63 at the time).

His amazement was complete when my cholesterol test came back. 3.5!

Needless to say, I am continuing on with both Transfer Factor Plus and Choice Prime.

I have never felt so good and had so much energy for many years.

Best wishes,

George Littlewood.

CIRCULATION & GENERAL WELLNESS

I am a healthy sporty person, but I used to always really feel the cold and have cold hands and feet.

Last autumn I started taking Transfer Factor Plus and Choice Prime, one capsule of each, twice a day.

Within weeks, I noticed that my hands and feet weren't as cold as they normally were. And after a few months I realised that I wasn't feeling the cold as much either.

During last winter my partner John came down with a severe flu and was house bound for a week.

As a preventive I increased my dose of Transfer Factor Plus from 2 capsules a day to 4 capsules a day for a few days. I was very impressed as I did not contract any flu symptoms at all and I was able to carry on my usual activities, including playing outdoor tennis throughout the winter.

Needless to say that John is now also taking both Transfer Factor and Choice Prime.

We are both now enjoying the benefits of having boosted our immune systems. The odd time we do feel the start of a sore throat, we just double our dose for a day or two and then the symptoms just disappear!

I just feel great, I have more energy and even my tennis has improved.

CIRCULATION & NUMBNESS

I have had circulation problems for many years, and I thought it was something I had to live with.

My hands and feet were always very cold, and at times I would experience numbness even in my face.

A good friend of mine introduced me to Choice Prime (original Pycnogenol Maritime Pine Bark Extract) capsules. I only took 2 per day and within 2 weeks my symptoms were almost non-existent. After the third

week the numbness was completely gone and I could feel warmth in my hands and feet.

My circulation problems are now a thing of the past!

COLDS

When I got a cold, it would usually stay with me – sometimes for months. I would think it was starting to clear up, and then it would come back again just as bad as before. As we get older, I think it is more difficult to shake these things off.

I was introduced to Transfer Factor Plus and started on a maintenance dose of 2 capsules per day.

I can honestly say that it has made a huge difference to me.

Now when I get a cold or viral infection, I triple my dose and the whole thing is over in about a week. And it doesn't come back again either. It is all cleared up and I am back to normal.

Transfer Factor is a great thing for keeping you healthy.

COUGHS, COLDS, FEVER, EARACHE.

For the six months from March to August 2000, our now fifteen-month-old son has had a long run of sicknesses: - earaches; fevers; coughs; colds; tummy upsets and eczema.

In early September, I consulted my Naturopath about him. She modified his diet and gave him Transfer Factor, 3 capsules per day.

In just over two weeks, his constantly running nose has stopped, his cough has cleared, and he is at last completely well.

As a preventative, we are keeping him on 1 Transfer Factor capsule a day.

CROHN'S DISEASE

I was diagnosed with Crohn's disease in 1991. Throughout the past several years I have suffered from constant pain in my abdomen along with irritability and

other symptoms of Crohn's disease. Crohn's disease is an inflammatory bowel disease and also causes malnutrition. Along with the Crohn's, I was diagnosed with Epstein Barr virus also known as chronic fatigue Syndrome. I had to take several naps during the day just to be able to regain my energy to perform little tasks. After reviewing various medical articles on Crohn's Disease, I chose to take an alternative approach to treatment.

Over the years I have tried many forms of therapy and supplements to help treat my condition. I even went to a hospital in Tijuana, Mexico to try some new alternative treatments and protocols. The most relief that I would have would last for a few weeks. I'm 6'2" tall and my weight was down to 163 lb. As time went by I was beginning to just accept the fact that I had to live with my condition and that there might never be any long-term treatment for Crohn's Disease.

In September of 1998 I learned about Transfer Factor. After taking Transfer Factor for a month I started to notice that I was sleeping through the night without any pain or irritability. Then I noticed that I could eat foods that I had stayed away from due to the pain they would cause in my abdomen. My energy level was increasing and lasting longer throughout the day and I wouldn't have to take naps.

It has now been over 22 months since I started on Transfer Factor along with the BIO-EFA (essential fatty acids). I currently use the Transfer Factor Plus product since it was introduced in June 1999. I have had absolutely no symptoms of the Crohn's disease since I began using these products. My weight is now 195 lb. and I feel great. The best part is I now enjoy eating healthy foods that I couldn't eat before.

I encourage anybody with a condition like mine - or anybody that has an interest in maintaining good health - to get on this program and give it at least six months. I can assure you that you will feel better and you will be blessed with the benefits of good health.

CHRONIC FATIGUE

3 years ago I started feeling my energy and health going down hill rapidly.

I was getting colds – flu's – allergies –pains in my hands when windsurfing-my energy was decreasing week by week.

For the past 2 years I have had to give up coating roofs (my JOB), and also my favourite addiction, windsurfing.

I had been to about 9 doctors over a 3-year period in the hope that they could help me. Each of these doctors told me the same thing. They said I was sick!! I **knew** I was sick for goodness sake!

I was prepared to take every test possible money – money was no object - I wanted to get better.

Doctor after doctor. By then I was getting pretty frustrated.

The last doctor told me I had hypoglycemia- a very bad heart coupled with high blood pressure. And allergies that would never go away. He said that I shouldn't exercise to the extent that I would break into a sweat, as in his opinion I would probably have a heart attack.

Well I have always been energetic and this news blew me away.

Needless to say I was in a bad way with all this mentally.

My sister convinced me to use some amazing products from a company called Neways - the complete repair for me she said.

After 3 months of taking all these products (vitamins and energy pills) costing around \$600.00 per month, I had not improved in any way at all.

In April a good friend of mine told me about his mother-in-law who was a Naturopath. I went to see her.

She gave me the total going over - **fifty times** more detailed than any doctor had ever done. She looked at my blood under the microscope and showed how my blood cells were all squashed totally out of shape.

She started me on Transfer Factor Plus at 3 capsules per day - and a cheap multivitamin I found at the Warehouse!

3 weeks later I felt a sudden change in myself – my energy was up – I felt better than I had for 3 years!

I felt so good, I started working out on my rower 30 minutes a day. A week later I added swimming 50 laps per day in the local pool.

After 2 months of doing my workouts I was feeling so good! I could now swim 80 laps of the pool or 2 km non-stop, and 30 minutes on my rower each day.

My pulse was down to 55 and my blood pressure down to 140 from 180.

And now I can windsurf again!!!

I still have a slight allergy on my hands, but apart from that my asthma has cleared 95% and my sinus problems have gone too. I also used to get cold sores every month but have had none for 9 months since taking Transfer Factor every day.

Life is suddenly very cool!!

Regards

CROUP

My two girls aged 2 and 3 both developed croup at the same time last year. They both coughed almost continuously and at nights often woke up finding breathing difficult.

This went on for about 3 months with no improvement and eventually my 3-year-old developed a chest infection and my 2-year-old got pneumonia.

Both had a course of antibiotics that helped but didn't clear it up.

I started them on 4 Transfer Factor Plus capsules per day and after only 4 days you could hardly tell they had been sick at all. They were running around playing happier than they had been in ages with only a mild cough that lasted only about a week longer.

I kept both girls on 4 Transfer Factor Plus capsules per day for 7 days then 2 capsules for another 7 days.

They now get 2-3 Transfer Factor Plus capsules a week for maintenance.

I have been amazed at the difference it has made – particularly to my 2-year-old who not only used to catch every bug going – but also always seemed to get it twice.

Now she rarely gets anything more than a runny nose that disappears quickly.

DEMENTIA

One of my friends' 89 year old dad had a fall prior to Christmas.

He was hospitalised and came out diagnosed 5th level dementia, the highest level there is.

Since Christmas he has been taking 8 capsules of Transfer Factor Plus per day.

He's a bit 'bloody minded' and won't take anything, so he's getting it via butter on sandwiches, dinner, deserts - you name it!

He has just been re-diagnosed at level 1 dementia and the doctors don't know why.

My friend's remark? "I've got my dad back!"

Kind regards,

Bill Perrins

DIABETES

Since my Diabetes was diagnosed five years ago, I have been on a diet control programme.

I have to admit that during that time I have not by any means kept strictly to it.

I see my doctor for twice-yearly checkups that involves having a blood test done before each visit.

When I had my six monthly appointment a few weeks ago he amazed me when he informed me that my system was back to normal!

As I sat in his surgery like a "stunned mullet", I realised that the healing process had come from a maintenance dose of Transfer Factor Plus and Transfer Factor for the past 18 months.

ECZEMA (ATOMIC)

I am now 15 years old and have suffered from Atomic Eczema since birth. This condition presented itself with weeping and broken skin all over my body - ears, eyes, nose, mouth and all sensitive areas.

Standard medication failed to reverse the problem, and my mother also tried a variety of Chinese herbal remedies and other treatments without success.

In March of 2002, when I was 14 years old, I was introduced to Transfer Factor and took 8 capsules per day. Within 12 weeks my teacher was commenting on my skin improvement and for the first time ever I was able to attend school summer camp. I continue to improve.

Shirley Lai
Auckland

ECZEMA

My 8-year-old son Julian suffers from eczema. It got so bad last winter that he had open wounds on his thighs – it was also affecting his appetite. His stress levels escalated and across his shoulders and down his spine he had what looked like acne with whiteheads that looked very angry and red.

We used all manners of creams and lotions and bath preparations.

Hoping to alleviate some of his stress and to boost his immune system, I started to give him Transfer Factor - 1 capsule 3 times daily.

I noticed the following day he was less agitated and within a few days his appetite had returned.

I continued with the Transfer Factor and also applied the TF RenewALL Gel.

Over a 3-day period the spots faded and then disappeared.

The Transfer factor and TF RenewALL Gel have been fantastic. We no longer have to put up with gluggy creams and constant reminders for him to stop scratching. Julian finds the capsules easy to take and the gel soothes on contact.

A big thanks from a happy mother.

ENERGY WHILE PREGNANT

Within 3-4 days of taking Transfer Factor Plus for the first time, I felt an increase of energy.

I woke up feeling ready to start the day, and at about 3.30pm when I had been previously ready for a snooze on the couch, I found I was still happy to keep going.

I am currently 7 months pregnant and have settled into a routine of 1 Transfer Factor capsule a day. I am convinced that I would be doing a lot more snoozing if I were not taking Transfer Factor.

FIBROMYALGIA

For twenty years I suffered with fibromyalgia.

I ached all over, had many sore joints, found it very hard to get moving in the morning, and always had sore legs by the end of the day.

In early August 2001 I began to take one Transfer Factor capsule and one FibroAMJ daytime-formula capsule before each meal every day.

By the end of August all my symptoms were gone!

I had no stiffness or soreness, and was moving normally again.

To think that I had put up with this problem for twenty years and then within one short month using these two great products I became completely free moving again, and as a bonus had much more energy.

Glennys Muir
Auckland

FLU & COLDS

Normally over the winter period I have a cold or get the flu. It usually hangs on for eight to ten weeks.

This can be a miserable experience when I have to front up to work as a shearing contractor – no matter how severe the distress.

To try to boost my immune system, I started taking Transfer Factor Plus at the dosage of two per day.

This winter for the first time I can ever remember, I have not had a cold or flu. Neither has my wife - nor has my eight-year-old son.

Thanks to Transfer Factor Plus we have good health.

I cannot imagine a day now when I would not take my daily 'immune-system booster'.

GLANDULAR FEVER - CHRONIC

My 7 year old daughter has been suffering from Chronic Glandular Fever for the past five months.

She has missed a lot of school and after school activities due to exhaustion and sickness.

I tried her on Transfer Factor and although at first I was very skeptical, I do believe that it has helped her enormously.

For the past few weeks since being on Transfer Factor, she has not missed any school and has managed to do all her after school activities as well.

Transfer Factor seems to have given her a lot more energy and a new lease of life.

HEART CHECK

Heart disease is the biggest killer of men and women in the Western world (just about to be displaced by the cancer epidemic – but that's another story...).

For many years I have been concerned that all the indicators existed for me to take my place in the heart attack statistics.

Let me explain...

- My Father died of a massive heart attack when he was just 68. He had angina for over ten years prior to that.
- My Mother has angina.
- I smoked for ten years or so when I was younger.
- My cholesterol is genetically high at 6.1 and there is *no way* I can get it down.

My doctor said that if I wanted to live a long life (I am 53), I should immediately start on a cholesterol-lowering drug – and that I would probably be on that forever. He said the risks factors in my history were too high to ignore, and that the plaque building up in the arteries in my heart caused by this high cholesterol would kill me.

I read about a new-technology CAT scan test called Heart Check offered by the Ascot Hospital in Auckland, New Zealand. It analyses and determines the plaque levels in the arteries of the heart.

I had this test and here are the results.

The scale goes from 0 - 400.

Zero means you have the plaque of a newborn baby. 400 means your arteries are virtually clogged shut. Make your plans - you're on the way out.

1-10 means minimal identifiable plaque – low risk – unlikely candidate for coronary disease or occurrence.

My reading was 3.9!

The nurse and radiologist were amazed and asked me how I had done that.

Here's what I told them...

For the past six years I have taken the Maritime Pinebark antioxidant called **Pycnogenol**.

In Europe it is known as the atherosclerosis antidote. It fights the build-up of plaque on the artery walls through its free-radical fighting antioxidant qualities. It strengthens the arteries, veins and capillary walls. It is the most powerful ally for the entire vascular system.

It also strengthens the collagen that holds all our cells together – the byproduct effect of that being we look younger too!

The Pycnogenol product I take every day without fail is **Choice Prime** – two small capsules per day. **Choice Prime** is the most powerful formulation of Pycnogenol ever developed. That is why I take this brand because – as I hoped you have guessed - I don't take chances when it comes to my own health.

The nurse and the radiologist were extremely interested in knowing more about this product so they could advise others who needed the protection too.

I know that taking **Choice Prime** has given me the best chance of beating my most likely killer – and for less than a couple of dollars a day!

If anyone would like to see the examination results, I would be most happy to forward them on.

By the way – I also take **Transfer Factor** every day to give myself the best possible fighting chance against the disease that killed three out of my four Grandparents – the current number two killer – cancer.

HEART DISEASE / ANGINA

I'm a retired butcher and 71 years young.

In 1982 I had 4 by-passes and in 1998 I had another 4 by-passes plus a new aorta heart valve.

Until recently I was on a list to have more operations as I was experiencing cramping in my groin because of blockages. I would get cramps whilst walking even very short distances and would have to stop and use my puffer a lot.

However because I had already had so many by-passes my cardiologist didn't think my heart could handle another operation. The scary thing was, I was regularly getting these cramps and if I couldn't have another operation, I knew they would only get worse.

Then my niece Desiree introduced me to **Choice Prime**. I started taking 1 Choice Prime in the morning and 1 in the afternoon. I have been taking Choice Prime everyday now for 6 months.

I feel like a new man!

My walking is much better now and the distance is getting longer without stopping. I never ever use my puffer anymore. In fact I have actually thrown it away!!!

Recently my wife and I had a 10 day holiday. I drove us all around the Taranaki Coast. This is something I couldn't do before.

I'm so happy, I feel great, no more operations for me!

HERPES, ECZEMA, ASTHMA

I am writing to let you know the affect Transfer Factor Plus has had on my nine year old son Dean.

He has been an asthmatic since birth, and also suffers skin problems (eczema), as it is usually associated with it. When he was approximately 5yrs old, he contracted the Herpes virus and suffered terrible cold sores, which would take forever to clear up. He was slow to heal and the skin that wasn't affected by eczema was dry and felt like sandpaper. His fingers would crack at the tips, and any cuts he got would turn into those terrible flesh eating type sores that would make his life a misery.

I was introduced to Transfer Factor Plus by my friend about three months ago. I had rung to tell her I was desperate about Dean's health and felt my only resolution to his latest bout was to visit the doctor once again to get antibiotics to clear up the horrible cold sores. He had two sores, one on his top lip, one on his bottom lip on the opposite side, and a small sore on the top of his nose and two up on his forehead - you can imagine what he looked like?

I used the Transfer Factor Plus at 4 capsules per day, and was astonished at the change, especially the change of the look of them while they were healing. After just three days of taking the Transfer Factor Plus,

there was a major difference in the two on his lips, and the whole lot were gone within 10 days. Gone with no sign of them ever having been there.

They healed from the inside out. I did not have to use any topical cream on the outside, and didn't cover them except at night. As they healed, the top did not form an ugly "crust"; the skin remained moist but not wet. This has never happened with the antibiotics. Yes, they would have eventually healed, but through experience, I know they would have been much slower to heal, they would have formed ugly "crusts", and cracked and bleed just through using his mouth. I continued to use the Transfer Factor for another three weeks during which time I noticed a huge difference to the rest of his skin. It was usually dry, itchy and old feeling, but it became youthful again, had some real moisture and softness to it - something I have never felt before on him. I am now using RenewAll on his skin to help as well.

On Wednesday morning he woke with two cold sores in their usual place on his lips. There had been no sign the night before. I immediately increased the dosage of Transfer Factor Plus to 8-9 capsules, and feel a bit silly saying this, but it was as if they healed before my eyes. By that evening they had shrunk in size, not spread as was usual and not infected either. They didn't have that angry red look about them and appeared to be only on the surface of his skin - not deep into his flesh. By Thursday morning they were smaller again and today the top one is nearly gone and the bottom one is not far behind. I have no doubt in my mind that they will be gone by Saturday/Sunday.

I can see now that the Transfer Factor Plus is helping Dean's body build up resistance, and that he is winning the battle to rid himself of them once and for all. It is certainly helping his asthma too.

I just want to say thank you for Transfer Factor Plus. Finally we have something that really works.

INFLUENZA

I came home from work one Friday in September 2000 with an extremely sore throat, bad headache, fever, nasal congestion, and a body that felt like it had been beaten about by a cricket bat!

I took 3 Transfer Factor Plus capsules and went to bed.

I have a friend who had had the same symptoms and was off work for three weeks with this particular flu bug. I felt very ill over the weekend, stayed in bed, drank plenty of fluid, and took two Transfer Factor Plus five times during both days.

On Monday I felt considerably better and continued the same dose. By Tuesday I felt almost normal and was able to return to work. By Wednesday I was my usual energetic self again.

As far as I'm concerned, this remedy beats being sick for weeks, or taking antibiotics and having upset bowels as a result.

I was very happy with the way Transfer Factor Plus boosted my immune system to overcome this infection relatively quickly.

Thank you Transfer Factor Plus.

H Wells

Auckland
New Zealand

INFLUENZA

In late May 2001 I went down with a bout of the viral flu.

I immediately started taking Transfer Factor Plus.

Normally within a few days I would have to go to the doctor for antibiotics as most infections usually go to my chest.

Back in February 2001 after returning from a six week holiday I was diagnosed with pneumonia in the right lung and really expected this new bout of flu would cause the same problem.

However on this occasion I did not have to visit the doctor and attribute this to Transfer Factor.

An added bonus was that the arthritis in my fingers, especially the index finger on my right hand, which continually got caught in door handles and was very red and swollen, has reduced in size and there has been no more pain.

I am certainly very grateful to the person who introduced me to this amazing natural product.

LEPTOSCLEROSIS

Transfer Factor Plus has helped my partner's Lepto and general well being, well beyond what I thought was ever possible.

He was a bit skeptical at the start but now he loves them. The other night he had two rum and cokes and didn't show a reaction to it. He would normally go red in the face), and that made it hard for him to have a social drink with his colleagues.

His breathing and nasal congestion have cleared up, and even his voice has cleared up.

All his symptoms of the Leptosclerosis have disappeared.

My partner says its marvelous stuff.

LUPUS (SLE)

I was diagnosed with Lupus one year after the birth of my second child. I was 33 years old and I considered myself to be fit and healthy.

I used many pharmaceutical creams and arthritis and anti-inflammatory drugs to ease the exhausting pain of feeling every aching bone in my body and being unable to lift the weight of my own head!

I had tried to clear my busy schedule in order to live a semi-normal life. I began to drive my car less often, go out less often and was taking afternoon naps while my baby slept.

I had to do this in order to take care of simple, normal duties in our household. (Cooking, bed making etc). A far cry from the full on super-woman style life I had been living.

Six months after my diagnosis I met someone who introduced me to Transfer Factor.

I started on (and still take) 3 capsules per day.

After the first couple of days, I began to feel less aches and pains. I lost the intense ache in my wrists and ankles. After a few weeks I realised I was beginning to life my life without thinking, "Oh, I can't do this or that."

I no longer sleep every day, the depression of living my life in pain has disappeared, and my eyes have got back that spark of vitality that I truly felt I had lost forever.

If I miss taking my capsules for even one day, the symptoms return – but it's great to know that it is a 100% natural product that's doing it for me – like eating a special food or something.

If I feel a little low due to a cold coming along or I have simply 'done too much' I double my daily dose for a day or two.

I feel my family and I were blessed the day I found Transfer Factor.

This combined with a regular yoga practice and my life is returning to normal.

When people ask me how can I possibly look so good... I tell them I am taking some very special MAGIC PILLS!!!

LUPUS (DLE)

Lupus is an autoimmune disease whereby antibodies attack the body instead of the virus. The two types of Lupus that have been identified are Systemic Lupus

Erythematosus (SLE) and Discoid Lupus Erythematosus (DLE).

SLE affects many areas and can range from mildly uncomfortable to near fatal. DLE is the less serious of the two, presented mainly as a skin rash.

It is this latter form (DLE) that I have been diagnosed with.

I am a fit and healthy woman and lead a very busy and sometimes hectic life. The only time my Lupus really becomes noticeable is when I am under extra stress.

I experienced the symptoms on my face, with a dry, red, scaly and sometimes unsightly scaly rash. When it really 'flared', it was very sore and tended to have a burning sensation.

My specialist had told me that topical steroid creams and the occasional steroid injection were the best I could hope for.

I was thrilled to learn that there was an all-natural product that I could take for LE, as it is commonly known.

I currently take 4 **Transfer Factor** and 2 **BioEFA** with **CLA** daily.

If I miss my daily dose of Transfer Factor, my face begins to 'flare up'. When this happens I increase my dosage of TF to 5 over 2-3 days and the symptoms subside.

It is great knowing that this all-natural product is helping keep my LE at bay and that I am also being safeguarded against any other infections as well.

My family are also taking Transfer Factor Plus for their general well being and they, like myself, are amazed at the results this product produces.

It is my strong belief that everyone would benefit from taking Transfer Factor, as it really is a truly remarkable gift derived from Mother Nature.

LYMPHOMA

I had previously had cancer removed from my lower leg, hospitalized for 5 weeks and recovered well from that operation.

Six months later I flew to Auckland for a Natural Health Practitioner Conference and on arrival was feeling very unwell. Instead of participating in the course, it turned out that I became the guinea pig for everyone to practice on!

Caught totally unaware, they found a lymphoma - cancer of the lymphoid tissue - on my thigh. I put my hand down and felt it - 8 cms long and 2 fingers wide! Well I tell you, I didn't fly back to Queenstown, as I always forbid my clients to fly if they have cancer.

It was then that I was introduced to Transfer Factor. I started taking Transfer Factor Plus, 3 capsules 3 times a day.

In the following 3 weeks, the lymphoma got smaller and smaller and then amazingly, it completely disappeared! I have been a practicing Natural Healing Practitioner for over 30 years now and I have **never** had such an immediate result with any other product.

It is now 6 months later and there is absolutely no sign of the lymphoma.

Naturally I now have many of my clients using Transfer Factor and Transfer Factor Plus.

MENOPAUSE

I recently had the "joy" of experiencing the full onset of Menopause. Any woman reading this who is either in, or has been in Menopause, will know what I am talking about and what this means.

I have always been against HRT, and recent findings on the life-threatening dangers of taking something derived from pregnant mares-urine, have confirmed that my stance on this was sound.

After a few weeks of putting up with continual hot flushes that came on anytime, anywhere – and a total lack of energy, I started investigating the natural products area to see if there was anything with a proven record.

After reading the 'Genistein' book by Rita Elkins, I decided to give BioGenistein Plus a trial.

Taking just 1 capsule a day, the results were virtually instantaneous. I have not had a single hot flush since the first day on that dosage, and all other symptoms have reversed themselves as well.

I'm amazed at how quickly this product worked for me, and I'm pleased to say that I am now completely symptom free.

MOLLUSCUM CONTAGIOSUM

I recently had occasion to test out the capabilities of Transfer Factor on myself, something that does not happen often.

For about a month, I was bugged by an unusual rash on the torso – back and front – and upper arms and legs. Not really threatening, but it was itchy to the point of real annoyance when I was showering, or in bed.

I hit my books in order to find what I had, and soon realised what I had was molluscum contagiosum. Apparently this could go on for a year or more.

No way I decided. Let's see if Transfer Factor can deal to this virus.

Well it sure did the trick!

12 days at the rate of 6 capsules per day and no more rash. No itching. Fixed!

As a homeopath, I find Transfer Factor and other products in the range to be extremely valuable additions to my use and prescriptions of homeopathic remedies.

MORNING SICKNESS & ENERGY WHILE PREGNANT

For the first 7 months of my pregnancy I suffered from terrible morning sickness.

I could not hold anything down till after lunch and had very low energy levels. I napped frequently throughout the day.

I started taking 2 Transfer Factor capsules every morning.

Within only 3 days I was feeling great! My energy increased, and I wasn't feeling so nauseous.

After 2 weeks my morning sickness completely disappeared. I just wish I knew about this marvellous product earlier on in my pregnancy.

Some pregnant friends of mine are also taking the Transfer Factor and they too are feeling better than ever.

And now that I am breast feeding, I know my milk is EXTRA rich in transfer factors - so my newborn is getting a REALLY good start in life.

MULTIPLE SCLEROSIS

This condition was first diagnosed in 1980 when I was 29. I had no further signs until early 1992 when I was laid low and was diagnosed with MS. I was paralysed down my whole left side and was hospitalized for around 4 weeks.

I had to learn to walk again.

I recovered to around 90% of my previous strength and was told then that I was in remission. From then on I have had bouts of MS with the remission periods getting shorter and with every bout of MS I would lose a bit more strength in my leg. I was slowly being robbed of strength and use of my left leg, walking was

getting difficult and I was with constant pins and needles in the feet. I also found it difficult to walk any distance.

According to my husband, my face was ashen in colour with a dry, drawn look, and as he said, "I can see the life slowly being drained out of you". He believed I would have been in a wheel chair in a few months at the latest.

In August 2002 I was sitting by the gas fire on the floor, when I went to get up my left leg gave way and I collapsed back onto the floor. It was at this time that I was introduced to Transfer Factor and Choice Prime.

Since I have been taking these capsules (9 Transfer Factor a day and 2 of Choice Prime) there has been a tremendous turn around in my condition. The pins and needles have almost gone. I can now walk around the shops without getting tired and have gained some strength back into my leg. My face accordingly to my husband is now alive and has a radiant look to it once more. The dryness of the skin has changed back to the normal soft look it once was.

I believe I am back in remission as I have had no further episodes of MS since starting Transfer Factor and am now looking to stay this way for longer periods then before and possibly for ever.

OOS (Occupational Overuse Syndrome)

For about 12 years I have had a sore shoulder as a result of a supermarket job in which I had a lot of repetitive work. Although not always sore, it would flare up when I did too much physical work, or if I became stressed.

Within a month or so of taking Transfer Factor I realized that the pain was not so bad, and would not last as long.

I have been taking Transfer Factor for 4 months, and now have absolutely no pain in my shoulder at all. I now take 1 Transfer Factor per day.

PARKINSON'S DISEASE

Jon has had Parkinson's Disease for the last 10 years.

Ten days in to using a product with Transfer Factors, maitake and shiitake mushrooms, zinc, beta glucan, thymic factors, IP6 and cordyceps, he lost all of his shaking.

He could stand up straight, and had eliminated most of his pain.

The shaking came back 24 hours later, but it came back less. He was able to work for 8 hours a day, stand

up straight, had very little pain - and at times, the shaking is not there at all. He was at least 40% improved at that point. This improvement came within 2 months, which was pretty exciting for Jon. He had also written a letter, something he had been unable to do for quite some time.

PNEUMONIA & HERPES SIMPLEX

In August 2000, I was doing some electrical wiring under a damp and mouldy house with the temperature near freezing.

When I had finished my breathing had become laboured and I had flu-like symptoms.

Within five days I was in hospital with pneumonia and a temperature of 41.8. I was one and a half days in emergency care with antibiotics being administered intravenously, and then three days in isolation. I was then allowed home under strict bed rest.

I then began on Transfer Factor Plus, six a day, and was out of bed after two days.

After 10 days I went back to the hospital for a checkup. My Doctor was amazed because he had said it should have taken three months for me to regain a normal lung capacity, and it was already at 98% which was even higher than normal for anyone.

A happy side effect has been that the cold sores I used to get regularly on my lips with exposure the sun have not come back once in the 10 months since I first took the Transfer Factor Plus.

PMS – PRE MENSTRUAL STRESS

I have had a condition called (PMS) Pre Menstrual Stress for the last 3 years.

The five symptoms that I suffered from caused by Estrogen Dominance are...

- breast tenderness
- water retention
- carbohydrate cravings
- mood swings/depression
- fibrocystic breasts

There are a number of other miseries as well – all far more common in pre menopausal women in their forties than one would assume.

I have been taking "BioGenistein Plus", 1 tablet a day, in conjunction with "FemPro" cream for 18 months.

Within a month of taking BioGenistein Plus and FemPro cream, all of my five symptoms had disappeared.

I still take 1 capsule per day and the cream without fail and will continue to do so.

Knowing that this Potent Soy Isoflavone will also help me in my fight against heart disease and cancer is important to me too.

These products have definitely changed my outlook on life and I would recommend them - especially to the menopausal baby-boomer age group.

PROSTATE – ELEVATED PSA READING

Following a checkup with my GP and a subsequent blood test, it was discovered that my PSA (Prostate Specific Antigen) reading was "slightly elevated for my age".

I normally take a daily maintenance dose of 3 capsules of **Transfer Factor Plus**, 2 capsules of **Choice Prime**, and 1 capsule of **Genistein**.

I immediately increased my dosages, and for eight weeks took 10 capsules of **Transfer Factor Plus**, 4 capsules of **Choice Prime**, and 2 capsules of **BioGenistein Plus** per day.

The results... a reduction that had the local practice nurses shaking their heads.

Down from 4.5 to 3.2 in just eight weeks!

Their reaction...?

What on earth did you do to get it down that quick?

Guess what I said.....?

PSORIASIS

During May 2000, I decided to see if Transfer Factor could lessen the red-raw, itchy psoriasis down my lower back. This condition arrived after the birth of my last child 16 years ago (my Dad also suffered with it as a teenager).

I proceeded to take the recommended maintenance dose of 1 capsule morning and night and didn't expect a quick fix for something I had had for so long. But during June the itching and the scaliness was reduced. I became aware that I was scratching less and that convinced me to continue.

About the same time the Company launched TF RenewAll - a topical clear gel containing Transfer Factor - for external use. I decided to attack it from the outside too!

By mid July the redness had gone and itching had stopped - even when I was hot from exercise sessions (when the waistband normally aggravated it).

I am amazed to say that the only thing I now have is scarring from my years of scratching.

But this is also now fading as new skin grows.

Transfer Factor and TF RenewAll have resolved a major health condition for me. I have had it for a very long time and nothing else has ever worked.

I also used a triple dose – 9 capsules per day - of Transfer Factor for my 16-year-old son when he suffered a virus that effected his inner ear, leaving him with no balance and chronic head-spin.

Two days later, he was back at school.

I cannot speak highly enough of this wonderful new, 100% natural product called Transfer Factor.

RESPIRATORY INFECTION

Our son was born in 1999 with a benign growth on the inside of his larynx, which meant that it was very difficult for him to breathe properly.

When he was six months old, the surgeon inserted a plastic tube to push back the growth and allow him to breathe. We were told that he would be operated on if necessary when he was older and stronger.

We consulted a Naturopath and the natural medicines she prescribed have – to the Doctor's and our surprise – reduced the growth within six months by 40%.

But a big problem with the inserted tube means that our baby is very prone to respiratory infection, and in August 2000, had a bout in hospital with pneumonia.

Our Naturopath then prescribed Transfer Factor, the contents of one capsule emptied onto a spoon with something to moisten it, and we fed to him that way, twice a day.

Within a couple of weeks of doing this, we noticed a huge difference in him. He is now completely free of infection, bouncing and happy for the first time since his birth.

SCHOOL SORES

My five-year-old son had school sores covering his arms, legs and lower back.

For three months I had him on antibiotics, continual antibiotic creams and special soaps and shampoos to try and keep his skin from drying out.

I finally started him on Transfer Factor.

He was taking 3 capsules per day and after three weeks, 90% of the sores were gone.

I then changed him onto 2 Transfer Factor Plus capsules per day and after three weeks all the sores had completely disappeared. He has not had any further sores for about eight months now.

He now takes just 2-3 Transfer Factor capsules a week for maintenance.

He also has far fewer colds and mild illnesses than he ever used to.

SCHOOL SORES & ECZEMA

My 7-year old son developed a bad case of School Sores which I decided to treat using Transfer Factor Plus (they were at the stage where normally only antibiotics would touch them.)

Within 2 days of taking 3 capsules a day, there was a slight change in the sores. After a week they were a little less inflamed, and had started to diminish. Every day after that I could see a change for the better.

After 3 weeks the sores cleared, leaving just red marks – but all the scabs had gone.

He also has bad eczema but that has also shown signs of improvement in this time.

My son now has a regular routine of 2 TF Kids tablets per day, along with TF RenewAll daily after his bath or shower to help keep his eczema at bay. It is now definitely less fiery, and has cleared a lot. Previously the only product we could find that would control it to this extent was a Hydrocortisone cream. We are much happier using Transfer Factor products knowing they are 100% natural and will have no negative affects on him.

SINUSITIS

I have suffered from sinusitis for 15 years.

Over the past few years I have had between 4-5 infections a year.

I have become immune to most forms of sinusitis medications, and antibiotics no longer work for me.

Since taking Transfer Factor and Choice 50 I rarely get sinusitis, and when I do it is a very mild case.

I have also benefited by not getting colds or flu during the winter.

Julie Erwood
Mokau

SINUSITIS

I have suffered from a chronic sinusitis condition for over 12 years.

I have had two operations to correct the situation, the second one resulting in a peculiar infection that proved resistant to treatment of any kind – until now that is. It rendered me a virtual social recluse because of its unpleasantness.

Transfer Factor Plus was recommended to me and after just one week – taking 4 capsules a day – I experienced a definite improvement.

On occasions I experienced that wonderful sense of smell – a completely new sensation for me. But just as importantly, my outlook became exuberantly positive and often I wanted to smell the flowers to check out my new skill.

It's early days as yet, but every day I feel better. That's apart from the medical improvement. This weekend I increased my dosage to 8 capsules a day.

I am improving every day.

SINUSITIS (CAT)

Our 11 year-old Burmese Cat Blarney always had sinusitis. Our vet couldn't do anything to cure this hence a couple of visits a year to see him for treatment.

Every winter he would get a runny nose. The antibiotics prescribed kept it in check but Barney would still have the sniffles - it did not fix the problem.

We were introduced to Transfer Factor and started to sprinkle a capsule over his food.

We did not have to take the cat to the vet the entire winter. He had no more symptoms of a cold or the runny nose.

When Barney went for his yearly check up recently, the vet could not believe how well he looked. No problems with his breathing, and no sign of the snuffles.

He was not surprised though when I told him what we were doing as he knew about Transfer Factor and was already buying it through a friend

SKIN GROWTH

I noticed a dark spot appear on the side of my nose near my eye. Within a few days this spot had grown in size and in the following days the area began to get thicker and raised. By this time the skin growth was about 1/4 inch in diameter.

I took Transfer Factor Plus orally and also opened a capsule and mixed the contents with TF RenewAll. I applied this at least three times a day for many days. Nothing seemed to happen at first except that the raised skin growth had stopped growing in size.

Then about 10 days the growth faded and within another day had disappeared altogether.

This is the second time I have had this sort of success with these products. Several months earlier a similar growth appeared on my forehead near my hairline. The skin in both these areas is now quite clear.

I now use TFRenewAll as part of my normal daily skin care. Just a small amount applied before I put on my moisturiser.

STRAINED MUSCLES

A few months ago I began to get a pain in the muscles of my right leg especially when I did any sudden movements.

It gradually got worse, and at times the pain and discomfort got to the stage that I had to take pain killers to help me through it.

I started taking a product called Flex4life and took three capsules daily for seven days during which time the pain and discomfort disappeared.

I experimented by taking one capsule a day as a maintenance dose and this has worked well, although some days when I have been over active or have become overtired, I take a second capsule.

On a recent visit to my doctor who was prescribing a new tablet for my heart condition he mentioned that one of the possible side effects could be a slight muscle strain.

So I showed him the Flex4life pamphlet and mentioned how my leg muscles had improved. His reaction was that it was a very good product as it contains glucosamine and he would recommend it to his patients.

SPORTS RECOVERY

I used to struggle at running distances over 800 metres. I did everything to try and improve but nothing would help, no matter what training I did.

I then start taking Transfer Factor Plus and immediately felt a change. My muscles that were always so tense after training became relaxed.

The next time I went for a run my lungs were able to handle a greater capacity. I don't get cramps anymore either, and my sinuses have cleared so I don't get breathless and can run longer distances.

Oh, one last thing - I also now get a good nights sleep.

SUPERBUG RECOVERY

After having the operation at North Shore Hospital for the removal of a tumour, my wife had to spend time convalescing.

After four days she developed a "super bug" and over the next two days, the wound developed into what you would describe as a valley. The infection went four centimetres deep and 5 centimetres wide, and the wound was 25 centimetres long.

We immediately panicked and on advice from a friend, my wife started taking Transfer Factor Plus at the rate of 12 a day.

After just two weeks the wound had all but healed.

After the doctor had removed the dressing on his fortnightly examination, his words were, and I quote: "I am witnessing a miracle." When asked why, he said he would have expected it to take at least 12 weeks to

achieve this stage (degree) of healing, and that he would have expected the infection to have gotten worse.

He then asked what the patient had been using and upon being told packed up his bag and left!

THIAMINE DEFICIENCY / WERNIKES ENCEPHALOPATHY

In November 1996, during my second pregnancy, I developed a thiamine deficiency that was later thought to be caused by a metabolic disorder.

As a result I developed a condition known as Wernikes Encephalopathy leaving me with Nystagmus affecting my balance.

I also suffered from severe headaches, so bad that at times I could barely stand. I could not drive for weeks on end. I also struggled to concentrate on any one thing for more than 10 minutes at a time.

I took thiamine injections 2-3 times per week to control the deficiency and over 3 years tried many products to try and improve my condition with almost no effect.

Then I started taking 3 Digestive Enzymes with Probiotics per day and 3 Fibro AMJ DayTime capsules per day. After only a few days on these products I felt better and after a week my headaches were 90% gone and my balance was back to normal.

After about 3-4 weeks my headaches were 99% gone and for the first time in 3 years I could run and play with my children.

From the day I started on these products I have not had to have a thiamine injection!

I then started to take 2-4 Transfer Factor Plus capsules per day, depending on how I was feeling. Since then, my general health has improved. I no longer get every bug going and if I do it is very mild. I used to get one sore throat after another – now I barely get more than a tickle before it disappears and my throat is back to normal.

I can honestly say that these products have changed my life. I now have my health back and can enjoy spending time with my family again. I thank God for this answer to prayer.

TRAVEL SICKNESS

I am 32 years old and for as long as I can remember I have never traveled well on the road.

Even a short trip would have me removing clothing and hanging my head out the window to try and keep the nausea, sweating and dizziness to a minimum. I would be very quiet and feeling the need to be sick.

As you can imagine traveling like this is not something I ever look forward to.

After taking BioGenistein Plus and Transfer Factor for nine days my husband and I took a three-hour trip. On arrival I couldn't believe how normal I felt. Usually it would take me a good hour to feel okay again.

My husband was so impressed he thought we would take the bendy back roads on the way home. Unbelievable, but this was no problem for me at all and I realised that it was not just luck.

A few days later we took another drive and I even managed to read a four-page brochure without looking up once.

I'm so impressed and now for the first time in my life, I look forward to all our trips away.

TUMOUR

My wife was diagnosed with an intestinal growth the size of tennis ball that surgeons said needed to be removed urgently.

I was quite concerned because I had just lost a brother-in-law to cancer. Because of this, I had been studying natural methods to combat cancer and during this period, I began to study Transfer Factors.

I decided that this was worth a try for my wife and bought a discount pack.

My wife reluctantly started on Transfer Factor Plus {9 capsules daily} 9 days before her operation. When opened up, the growth had decreased in size to that of a golf ball. This mystified the surgeon and he was at a loss to explain the reason for the decrease in size of the tumour.

But we feel confident in the knowledge that Transfer Factor Plus is what made the difference.

ULCER - LEG

In May 2000, while I was in the Fiji Islands, a sealice bite on my lower right leg became infected, predominantly with Strep and Staph, which are mostly antibiotic resistant now. It deteriorated alarmingly quickly into a tropical ulcer.

I came back to New Zealand and treated it with many herbs and homoeopathics, both topically and orally.

After three weeks it was so painful that I needed to stop work and keep my leg up. Although I felt well, the ulcer continued to grow until it was 8cms across. I remembered that Transfer Factor had just been introduced into New Zealand and I arranged to get some at once.

I began with Transfer Factor Plus capsules, 2 at a time, 5 times a day, and within 24 hours I could see a change. The ulcer stopped growing and began to improve. I also used the Transfer Factor on the ulcer by emptying a capsule into ozone gel and applying that with a dressing. In the next month it had completely healed over.

Lower leg ulcers are notoriously hard to cure and slow to heal. I was impressed as I observed the pace of the healing of my leg.

I have no doubt that, although everything I used was useful – and that I am basically a healthy person – it was the Transfer Factor that gave my immune system the big boost that changed the situation and greatly sped up my recovery time.

VIRAL INFECTION & HAEMORRHOIDS

My usually active 82-year-old mother in Taupo contracted a viral infection and became even more ill on an antibiotic she was prescribed. It caused her to develop intensely painful haemorrhoids.

My brother brought her to be with me in Rotorua, and when she arrived she was obviously very sick and in extreme pain. A relative who is a nurse said she should immediately be admitted to hospital. However I suggested she stay with me for at least 24 hours to use some natural remedies, and then the nurse could check again.

I immediately began to give my mother Transfer Factor Plus. I gave her 3 capsules every four hours through the night and all the next day and night. She also used it internally several times – a mixture I made from the Transfer Factor Plus powder and a gel.

When the nurse visited us the next morning, she was amazed at my mother's obvious recovery. She actually said, "This is a miracle!" My mother's pain had completely gone; she had her colour back and was able to move around.

One week later after my mother had gone back to Taupo, I rang to check on her. She had just come back – on her motorbike! - from a meeting at which she had given a presentation. To think that she had been so sick, and yet within such a short time, using the Transfer Factor, she is quite well again.

VIRUS & PAIN

A few months ago I got very sick with a virus which left me, still several months later, sometime gasping for air.

Since taking Transfer Factor Plus that has disappeared. I have more energy and seem to be able to achieve so much more.

If I even start to feel slight sick I up my dosage of Transfer Factor Plus and so far this winter have not had any of the illnesses that most people seem to be getting.

Also due to operations and cutting myself I have several nerves that have been cut, which have left those areas very sensitive and sometimes painful. Since taking Transfer Factor Plus I have noticed that those areas are not as painful or sensitive as they used to be.
